

POS Media Display UV-70-SED-USB

7" LCD-TFT monitor with Digital-Panel, MPEG-Player and motion sensor (optional)

7" LCD-Display with an high resolution Digital-Panel, integrated Media-Player for SD-cards, with motion sensor (optional for sound or movie and sound) and stereo loudspeakers. The easy updating via USB 2.0 auto-download enables the content to be changed without any special know-how. You can save one or more films, and choose to play one or all movies. The elegant design of the plastic housing and the cover of the SD-card are all good arguments for using this model at the POS. Standard colors are black and silver. Special colors are available depending on quantity.
